Motorcycle Exhaust Project Brief

Buyer requirements for sourcing and manufacturing review

Complete what you know and write To be confirmed where needed. Use one brief per design. Share only samples and files you have the right to use.

Company and contact

Company

Contact name and role

Email

Phone or messaging contact if preferred

Your project reference

Date

Part and application

Part or component and scope

Describe what you want sourced or made.

Motorcycle model and year

State the intended use and application. Fitment still requires review.

Reference sample photographs or authorised drawings

State what is available and include drawing or file revision numbers.

Quantity and specifications

Estimated quantity

State the quantity per design and unit of measure. Note sample needs separately.

Material and surface finish if known

List requested specifications or mark the details to be confirmed.

Project Requirements and Attachments

Add a separate specification or attachment list if you need more space.

Delivery destination

Country and city. Add a postal code or delivery terms if known.

Target date and flexibility

Specify whether the date is for a sample, goods ready to ship or arrival.

Documents and inspection or test requirements

List your requirements and any applicable standard or acceptance criteria if known.

Attachment list and revisions

List filenames, drawing revisions or sample details. Note any sharing restrictions.

Questions and details to be confirmed

List missing information, decisions or responsibilities that need discussion.

This brief records your requirements. Feasibility, specifications, sampling, costs and lead time require project review and written agreement.

Share this brief and attachments through your agreed contact channel. For a new enquiry, visit www.ysisupply.com/inquiry.
